Evening Brief

Date: Sunday September 9th, 2018

Weather Summary

*** Stronger Wind Gusts beginning Monday through Thursday ***

A prolonged period of windy weather is expected from Monday on thru much of the upcoming week, as a deep low pressure system slowly moves onshore across the Pacific Northwest. Afternoon gusts could exceed 35 mph across many areas. Humidity levels will remain seasonably dry early this week, but should slowly increase by midweek, even rising sharply across Idaho/Wyoming which could help reduce fire activity across the higher elevations of Idaho and Wyoming.

No significant lightning or precipitation is expected over the next several days.

Note... forecast models typically have a difficult time with the pattern changes this time of year, and therefore forecasts beyond the 3 day period may change significantly.

Preparedness Levels & Great Basin Fire Activity (from WFDSS)

Great Basin	4	Light Initial Attack Activity
National	3	GB New Fires and Acres: 12 fires 81.7 acres; 435 acres large fire growth

Great Basin Fuel Status [interactive link](#) (Use Edge, Chrome or Firefox browsers)

Fuels and Fire Behavior advisory has been issued for [Northern Great Basin](#)

Fuels/Fire Potential

Fuels have moderated slightly over the last few days, however ERCs are still in the 80th - 90th percentile in many areas of Idaho, northern Nevada and northern Utah.

Heavier 1000-hr fuels are still well below normal in many of these areas and near record lows for the time of year in some locations.

ERC's are below the 50th percentile across most of the southern third of Nevada, and Utah, into the AZ Strip.

Sagebrush Live Fuel Moisture levels across the northern half of the Great Basin are near or just below early September normals as low as 65-80% in many areas of Northern Nevada, NW Utah, and far Southern Idaho. Grasses are cured in all areas.

Fuels will likely gradually modify this coming week, especially across northern areas, due to cooler temperatures and higher humidity, despite the stronger expected winds.

Resources

Aviation within the Great Basin

- 1 VLAT's, 5 LATs, 0 CL-415's
- 21 SEATs, 2 Fire Bosses
- 12 Type 1 Helicopters / 12 Committed
- 14 Type 2 Helicopters / 14 Committed
- 20 Type 3 Helicopters

Crews Committed within the Great Basin

- 13 IHCs Committed / 1 Available
- 20 T-2 IAs Committed / 0 Available
